Name: \_\_\_\_\_

**Pollination:**

What is pollination:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

There are two mechanisms for pollination: wind and insect. Flowers are adapted to suit the mechanism by which they are pollinated.

Identify which flower illustrated below is wind-pollinated and which is insect-pollinated:

Name three flowers that are insect-pollinated:

\_\_\_\_\_

Give an example of a type of plant that is wind-pollinated:

\_\_\_\_\_
